Professional Summary

Final-year B.Tech student with hands-on experience in Python, JavaScript, REST APIs, AI tools, and web development. Built projects involving AI automation, local LLM integration, and full-stack applications using Supabase. Interested in Python development, AI-powered applications, and backend systems.

Technical Skills

Languages: Python, JavaScript, HTML, CSS

Tools & Technologies: GitHub, Supabase, REST APIs, VS Code, n8n

AI Tools: Ollama, Prompt Engineering, AI Workflow Automation

Projects

Weather Dashboard — JavaScript + REST API (GitHub) Mar 2025

- Built a responsive weather dashboard using REST APIs to display real-time weather data.
- Implemented dynamic UI updates for temperature, humidity, and weather conditions across devices.
- Integrated geolocation support to auto-detect user location and fetch relevant weather data on page load.
- Designed an intuitive search interface allowing users to look up weather for any city worldwide.

Student Portal — Supabase + Facial Recognition (GitHub) Mar 2025

- Developed a student portal with authentication and academic record management using Supabase.
- Integrated facial recognition-based attendance functionality with a responsive user interface.
- Implemented role-based access control to differentiate between student and faculty dashboards with secure data handling.
- Used Supabase real-time subscriptions to reflect attendance and grade updates instantly without page reload.

AI Email Agent — Ollama + OpenClaw (GitHub) 2025

- Built an AI email assistant using Ollama and OpenClaw for automated email drafting and responses.
- Implemented local LLM workflows and trigger-based automation without relying on cloud AI models.
- Designed context-aware prompt templates to generate professional replies based on incoming email content and intent.
- Enabled fully offline operation by running the LLM locally, ensuring data privacy and eliminating API costs.

Experience

Android Developer Intern, Eduskills Foundation (Certificate) Jan 2025 – Feb 2025

- Completed Android Developer Virtual Internship using Kotlin and Android Studio.
- Worked with Jetpack libraries, navigation components, and mobile UI development.

Education

SR University — B.Tech in Computer Science 2022 – 2026

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Network Security

Certifications

CCNAv7 – Cisco Networking Academy (Verify), Jan 2024

AWS Cloud Certifications (Verify), Mar 2024

Network Security – AICTE (Verify), Mar 2024
